

## **FOREWORD**

The Canadian Society for Civil Engineering has a long-standing tradition of recognizing members for their career achievements and for the excellence of their technical papers. This year, fifteen members are distinguished through their election as Fellows, eight are receiving awards for career achievements in their specialty areas of civil engineering. The Society is granting its sixth Award for Governmental Leadership in Sustainable Infrastructure. As well, the authors of three technical papers will be receiving best paper awards, one of which, the Sir Casimir Gzowski Medal, is Canada's oldest engineering award.

This booklet summarizes the career achievements of the recipients of the various honours, awards and fellowships, recognizes special contributions to the Canadian Society for Civil Engineering, and lists many of the past winners of awards. On behalf of the Board of Directors and all members of the Society, I extend my heartfelt congratulations to all award recipients.

Jim Gilliland,  
President

## **AVANT-PROPOS**

La Société canadienne de génie civil rend hommage une fois de plus à ses membres qui se sont distingués par l'ensemble de leur carrière ou par la qualité de leurs communications techniques. Cette année, quinze membres ont été élus au rang de « Fellow », huit recevront des prix pour leur apport, tout au long de leur carrière, dans des domaines précis du génie civil. La société décernera pour la sixième fois le Prix pour le leadership gouvernemental en infrastructure durable. De plus, les auteurs de trois communications recevront des prix pour meilleur communications. Un de ces prix, la médaille Sir Casimir Gzowski, est le prix le plus ancien décerné au Canada dans le domaine du génie.

Cette brochure résume les carrières de nos nouveaux « Fellows » et lauréats, souligne les contributions particulières à la Société canadienne de génie civil, et donne les noms de plusieurs anciens lauréats des divers prix. Au nom du conseil d'administration et de tous les membres de la société, j'offre mes félicitations les plus chaleureuses à tous les récipiendaires.

Jim Gilliland,  
Président

### TONY BÉGIN

Graduated from Sherbrooke University in civil engineering in 1993, he also completed his Master's degree in 1995.

He joined immediately the Canam Group engineering team as a structural steel connection designer. He worked for the Steel Plus Network Canam business unit servicing more than 120 steel fabricators in North America. He has developed the engineering and design assistance services by visiting over 100 engineering firms across Canada. His function today is to promote LEAN Construction practices and the Integrated Project Delivery collaborative approach to professionals, owners and contractors.

He has been a volunteer within the Canadian Society for Civil Engineering (CSCE) over 25 years. First as the President of the student chapter (1989-1994) at UofS, second as the chair of the Quebec Section (1995-2005), third as VP of the Quebec Region (2006-2013) and during the last 3 years (2013-2016) he has followed the presidential track as SVP, President Elect and President/Chairman of the Board. He is actually the immediate past-President and Chair of the Corporate Engagement Committee. In 2008, he got involved also as the Chair of the Local Organization Committee (LOC) of the CSCE Annual Conference in Quebec city who attracted more than 500 people.

He is engaged with his wife Caroline and their 3 children; Hubert (17 years old), Justine (15 years old) and Phillip (11 years old). He is coaching his sons in his regional minor hockey league. His favorite activities are hockey, golf and camping with family and friends.

### PETER H. BISCHOFF

Peter Bischoff is a Professor in the Department of Civil Engineering at the University of New Brunswick in Fredericton, where he has contributed to teaching and research in the area of reinforced and prestressed concrete since 1992. Prior to joining UNB, Peter spent several years at the Institute for Concrete Structures and Materials, Karlsruhe University, Germany and has also spent a few years working as a consulting structural engineer. He received his B.A.Sc. in Civil Engineering from the University of British Columbia in 1979, M.Eng from McGill University in 1983, PhD from the University of London, UK in 1988, and DIC from Imperial College of Science and Technology, UK in 1988.

Dr. Bischoff's research interests include serviceability behaviour of concrete structures, use of fibre reinforced concrete (FRC) in structural applications, soil-structure interaction related to ground supported slabs and footings, and impact behavior of concrete. His work related to deflection of reinforced concrete has gained international recognition and was awarded CSCE's Casimir Gzowski Medal in 2008 and the American Concrete Institute (ACI) Design Award in 2014. The so-called "Bischoff's equation" for computing deflection is being adopted by ACI's Building Codes for design of steel and FRP reinforced concrete.

Dr. Bischoff is an Associate Editor of the Canadian Journal for Civil Engineering, is active on several ACI technical committees, and is a member of the CSA Task Force working on implementing use of fibre reinforced concrete and ultra high performance concrete into the Canadian Highway Bridge Design Code. Peter is a Fellow of the ACI, and is a registered Professional Engineer in New Brunswick.

## **GIRMA BITSUAMLAK**

Dr. Bitsuamlak is a Canada Research Chair in Wind Engineering. He serves as a Research Director at the WindEEE Research Institute and Western's Site Leader for Sharcnet. He is pioneering the use of high performance computing and multi-scale experimental wind engineering applications. He has co-developed a novel large open jet hurricane testing facility generically named "Wall of Wind" at Florida International University. He is currently leading the research activities at the WindEEE Research Institute focusing on tornado/downburst other multi-scale wind research assisted with the unique WindEEE Dome facility. He is the recipient of prestigious awards such as the Canada Research Chair, Bikila Award, Ontario Early Carrier, and

NSF-CAREER (in USA). He has also significantly contributed to the industry, where he executed aero-elastic wind tunnel based analysis of supper-tall buildings such as Freedom Tower in NY and Burj Khalifa in Dubai while working as a senior wind engineer with RWDI Inc. in Guelph On among 100 other wind engineering projects. His former graduate students and postdocs are now leading wind engineers and risk modellers in major firms and universities around the world.

## **JACQUES J. BOISSONNAULT**

Jacques Boissonault obtained his B.Sc. in Civil Engineering in 1984 from the University of New Brunswick. In 1985, he joined the firm of Boissonault McGraw as project Engineer. Becoming lead engineer of the Structural and Civil Divisions. In 1993, Jacques became Principal and President of the Company.

With over 30 years of expertise in the design and construction of major institutional and Industrial complexes in Northern New Brunswick, combined with Jacques' personal interest in the development of efficient and environmental sustainable solutions, has encouraged him to participate in innovative water and waste water projects.

In 2016, Jacques was the recipient of the Atlantic Canada Water and Wastewater Association Award sponsored by the Water Environment Federation. Jacques is also a former counsellor of the Association of Professional Engineer & Geoscientist of New-Brunswick (APEGNB).

Jacques is a member of The Port of Dalhousie Authority. He is also a past president of the Restigouche Minor Hockey Association.

Jacques' dedication to his family and to his profession has convinced three (3) of his children to pursue carriers in engineering and to continue long stating family tradition started by his father, Mr. Richard J. Boissonault, PEng., Lifetime Member APEGNB.

## PETER CALCETAS

Peter Calcetas earned his Bachelor (1993) & Master (1996) of Civil Engineering & Master of Business Administration (2000), from Concordia, Montréal. He trained at Duke, Ryerson, Toronto, McGill & Calgary toward his Civil Engineering PhD (2019) focused on Ultra High Performance Concrete (UHPC) at McMaster, Hamilton. Peter demonstrated and/or lectured on UHPC at McGill, Waterloo, MIT, Harvard, North Western, Cooper Union, Georgia Tech, West Point & Columbia.

Mr. Calcetas practiced Structural Engineering at BCA (1989), combined with Entrepreneurship (1995), and service as 2nd LT, Military Engineering, Canadian Army (1997). He joined Lafarge (2000) in Business Development,

completing several successful mergers & acquisitions. Progressed to Technical Services, managing Lafarge's energy portfolio. Peter joined the Ductal® BU, Lafarge's UHPC, advancing from Manager (2002) to Director (2007). He transitioned to Marketing Director, Lafarge Cement (2010), and won the President's Award for Innovation (2011). He joined Holcim (2012) as head of Corporate Product Development & Materials Group; winning the CEO Innovation Award. Peter simultaneously lead the alternative materials subsidiary, GeoCycle, as Sales Director; and governed as the Board Director & Corporate Secretary for Great Lakes Slag Inc. Mr. Calcetas is currently the Chief Operating Officer & Vice President Engineering for Spring Valley Corp. (2016), guiding development, manufacture and commercialization of building systems incorporating composite technologies, including UHPC.

As Chair, Membership Services Committee (2012), Peter executes growth initiatives, including CSCE's 1st Online Member Survey, which inspired engagement initiatives: Mentorship Online Portal with Corporate Partner Mentor City, the Loyalty Program and the information sharing HUB Taskforce.

## MARK F. GREEN

Mark Green is Professor and Associate Head in the Department of Civil Engineering at Queen's University. He completed his B.Sc. in Mathematics and Engineering at Queen's in 1987 and then his Ph.D. at the University of Cambridge, UK in 1991.

He has served as co-chair of the Advanced Composite Materials in Bridges and Structures (ACMBS) Conference in Kingston, as chair of the CSCE Technical Subcommittee on ACMBS, and as associate editor of the Canadian Journal of Civil Engineering.

In research, he has studied the dynamics of bridge-vehicle interaction, and is a leader in applications of fibre reinforced polymer (FRP) materials to concrete structures. Dr. Green is particularly well-known for durability of FRPs in cold regions, for strengthening beams with prestressed FRP sheets, and for the fire resistance of concrete structures with FRP. He is currently leading an innovative NSERC CREATE program on Sustainable Engineering in Remote Areas (SERA).

He won the 2013 Professional Engineers Ontario Medal for Research and Development, the 1999 Pratley Award, and the Premier's Research Excellence Award (2000). He is a Fellow of the International Institute for FRP in Construction (IIFC), and has published over 250 journal and conference papers.

Dr. Green is a member of the Mohawks of Bay of Quinte who is active in Aboriginal education. He is currently co-chair of Queen's Truth and Reconciliation Commission Task Force and a member of the Circle of Advisors for Queen's Aboriginal Access to Engineering initiative.

## SUSANN HICKEY

Susann Hickey received her B.Eng., in Civil Engineering from Memorial University of Newfoundland in 1995. Susann, who is a practicing civil engineer with the municipality of Paradise, Newfoundland and Labrador, is a member of the Professional Engineers and Geoscientists Newfoundland and Labrador, Women in Science and Engineering – Newfoundland and Labrador and has contributed to the CSCE at both the section and national levels.

Susann has over 20 years of diverse experience in design and project management, construction management and environmental and regulatory management. She has worked as a consultant, as owners engineer and with government. Susann began her career working with the post-tensioning subcontractor at the Hibernia gravity base construction site at Bull Arm, NL. She has been involved in a number of projects including the Vale Argentia Demonstration Plant and Long Harbour Processing Plant projects and the Kami Iron Ore Mine development project.

Susann has spent the last 15 years as a member of the Engineering and Geoscience Month Committee of the Professional Engineers and Geoscientists of Newfoundland and Labrador. She serves on the Engineering and Applied Science Advisory Committee of Memorial University of Newfoundland. She volunteered as an advisor with the Junior Achievement Company Program. She has served as Vice President Atlantic Region and as a board member of the Canadian Society for Civil Engineering. She was a member of the Local Organizing Committee for the 2009 CSCE AGM and Conference, held in St. John's, NL. She has been involved with the CSCE Newfoundland and Labrador Section executive team since 2009.

## CONSTANTINE JOHN KATSANIS

Dr. Katsanis is a professor at the École de technologie supérieure (ÉTS), in Montreal. His research interests include construction project management, building economics, value analysis and quality management, organizational structures, performance and efficiency in AEC firms, and the modelling of complex dynamic systems.

He received his Bachelor's degree in Civil Engineering and his Master's of Engineering from Concordia University and holds a Ph.D. from the Université de Montréal.

At ÉTS, Dr. Katsanis spearheaded the development of a new joint Ph.D. program in Engineering Management with the University of Sharjah at the United Arab Emirates.

Prior to his academic career, Dr. Katsanis, was in private practices for over 20 years as an engineer, cost consultant and project manager, attaining the position of Vice President & General Manager.

He joined the Canadian Society for Civil Engineering in 1979 and has served in a variety of capacities. He served as Co-Chair of the Technical Committee and as Member of the Organizing Committee for the 2013 Annual Conference of the CSCE in Montreal. In 2005, he was a member of the Technical Committee for the Annual Conference in Toronto, and served as the Secretary of the Construction Division in 2004-2006. Dr. Katsanis is a member of the History Committee of the CSCE and the Founder and Inaugural Chair and of the Engineering Management Committee of the CSCE.

He is a member of several editorial boards of scientific journals and the author and contributor of numerous journal articles and books. He is a founding member of the Engineering Project Organization Society (EPOS) in the U.S.

Dr. Katsanis, hold professional registrations with the Order of Engineers of Quebec the Professional Engineers of Ontario and the Canadian Institute of Quantity Surveyors.

## SID LODEWYK

Sid Lodewyk graduated from the University of Alberta with a B.Sc. in Civil Engineering in 1984 and a Master's degree in 1986. Sid and his wife Trish have worked and lived in Edmonton since then, raising three wonderful children.

Sid has 28 years' experience as a municipal engineer in various positions with the City's drainage utility including planning, monitoring and operations. He is currently the General Supervisor of Pumpwells at the City of Edmonton and is in charge of a group of 40 engineers, technologists and tradesmen. Together they take care of over 200 facilities in the sewerage and drainage systems of the City that control flows for capacity and environmental protection, pump

wastewater, and control odor.

Sid has been involved in many key initiatives for Edmonton's drainage utility including environmental negotiations and reporting, sewer rate setting, long range system planning, combined sewer overflow control, storm water control and quality projects, implementing an ISO14001 System and long range capital planning. He helped develop affordable solutions for servicing new development areas and has been involved in negotiating agreements between Edmonton and surrounding municipalities.

Sid served on the board of the North Saskatchewan Watershed Alliance and on several committees for the provincial Water Management Framework and Industrial Heartland initiatives. He has authored over 30 conference papers and journal articles and has been a member of the CSCE for over 30 years. Sid served the CSCE's Edmonton Section as an executive and section chair between 2013 and 2016.

## JOHN P. NEWHOOK

John Newhook is a Professor in the Department of Civil and Resource Engineering and Vice-President Research (Acting) at Dalhousie University. He is also the Director of the Centre for Innovation in Infrastructure within the Faculty of Engineering.

John Newhook received his Bachelor of Civil Engineering from the Technical University of Nova Scotia in 1989 and his Master of Applied Science in 1992. After working in consulting, John returned to studies and completed his PhD in Engineering at Dalhousie University in 1997. Dr. Newhook joined the University of Calgary in 1999 before returning to the Maritimes and

Dalhousie in 2001.

John has been a member of CSCE since his days as chair of the student chapter in 1988. He has served on the organizing committee for the last two conferences in Halifax and SMSB 1994. He is currently the Vice President, Program Coordinating Committee – Technical Programs.

With over 27 years of experience in structural engineering research and consulting, his interests include structural health monitoring, structural analysis and design, bridge engineering, and the use of advanced composite materials in civil engineering applications. He is active in various technical societies, continues to practice consulting and a member of the Canadian Highway Bridge Design Code.

Outside of professional activities, John is active in research in the science of curling and in the promotion of the sport. He has coached several bantam and junior teams in Nova Scotia as well as the coach for the Dalhousie Curling Teams in the past three CIS University Championships.

## VAN-THANH-VAN NGUYEN

Van Nguyen is Endowed Brace Chair Professor of Civil Engineering at McGill University. He received his BEng from National Institute of Technology in Vietnam in 1973, MEng from Asian Institute of Technology in Thailand in 1975, and PhD from Ecole Polytechnique of Montreal in Canada in 1979. He has been Chair of Department of Civil Engineering and Applied Mechanics since 2009, and has also served as Director of the Brace Centre for Water Resources Management (2007-2016) as well as Associate Director of the Global Environmental and Climate Change Centre at McGill (2004-2010).

Professor Nguyen's scientific and professional contributions over more than 30 years have been in the areas of Hydrology and Water Management. He is author or co-author of over 200 publications in journals, conference proceedings, research monographs, and practical engineering guidelines. He has served in many scientific journal editorial boards and has been invited professor at universities in Australia, Canada, Japan, Malaysia, Singapore, and Thailand. He has been invited to deliver prestigious keynote lectures at scientific conferences in Canada and abroad. Furthermore, since several years he has been involved in international co-operation with colleagues in North America, Europe, and Asia-Pacific regions as well as an active member of several professional associations (AGU, AOGS-President of the Hydrological Science Section, APHW, ASCE, AWRA, CSCE-General Chair of the 22nd Hydrotechnical Conference, IAHR, IAHS, and IWA). Finally, as a professional engineer, he has served in various expert committees for national and international organizations and consulting companies in Canada and in other countries.

## KENT NOVAKOWSKI

Kent Novakowski is a Professor and Head of the Department of Civil Engineering at Queen's University, Kingston, Ontario. Dr. Novakowski obtained his undergraduate and graduate degrees from Brock University, and the University of Waterloo, respectively. Prior to joining the Department of Civil Engineering in August of 2000, he led the Groundwater Contamination Project at the National Water Research Institute in Burlington, Ontario.

During his career, Dr. Novakowski has focused on research related to groundwater supply, contamination, and remediation in fractured bedrock aquifers. These aquifers represent the most vulnerable water supplies in Canada, typically susceptible to contamination from ground surface, and recalcitrant to clean-up. He has published more than 200 papers and abstracts on this topic in a variety of proceedings and in the leading refereed journals in field. Dr. Novakowski has participated in the presentation of 18 professional short courses given on groundwater in fractured rock at venues across Canada, the US, South Africa and Australia. In 2013, Dr. Novakowski was recipient of the Engineering Excellence Medal as awarded by Professional Engineers Ontario.

In addition to his long-term leadership of the Department of Civil Engineering at Queen's, Dr. Novakowski is the Founding Director of the recently-named Beaty Water Research Centre, an affiliation of more than 45 water researchers from a wide variety of disciplines across Queen's and the Royal Military College in Kingston. He has also served as a consultant to various groundwater engineering companies, to the mining community, and to the nuclear waste industry in North America and abroad.

**HUNTLEY O'CONNOR**

Huntley O'Connor is a senior structural engineer with more than fifty years of experience in the design of structures. Mr. O'Connor was responsible for the structural design and field review of a number of large projects in Saskatchewan, Alberta, and British Columbia including the First Nation University of Canada in Regina and the Regina General Hospital, Phase 2, RGH Project '98. Huntley has also acted as Project Manager on several projects in Saskatchewan. Mr. O'Connor has retired from full-time employment

Huntley has been married to Grace O'Connor (nee Pollock) since 1972. Grace is a retired pediatric nurse. They have two children, Aaron who is married to Melissa and Tyler (deceased) who was married to Erin. Tyler and Erin's son is Nathan, now 7 years old.

Huntley's interests are working out at the gym, skiing and golfing. He enjoys movies, music, taking his grandson Nathan swimming and spending time with family and friends.

**BRENT SLEEP**

Brent Sleep is a Professor in the Department of Civil Engineering at the University of Toronto and has been Department Chair since 2013. He completed a BAsC in Chemical Engineering at the University of Waterloo in 1982. After completing his BAsC he volunteered with the international development organization, CUSO, and spent two years teaching mathematics in a college in Nigeria. He completed an MEng in Chemical Engineering in 1987 and a PhD in Civil Engineering in 1991, both at the University of Waterloo.

Professor Sleep and his research group conduct research on a range of soil and groundwater remediation technologies including soil vapour extraction, thermal remediation, bioremediation, chemical oxidation, and chemical reduction. He also conducts research on subsurface pathogen transport and on hydrology of green roofs.

Professor Sleep has served on the British Columbia Science Advisory Board, the U. S. National Research Council of the National Academies Science and Water Technology Board Committee on Source Removal of Contaminants in the Subsurface, and the U. S. Department of Energy Committee on Dense Nonaqueous Phase Liquids in Low Permeability Media. He has served as Editor-in-Chief of the Journal of Contaminant Hydrology since 2010, and as Associate Editors of Advances in Water Resources (2000 to 2013) and the Vadose Journal (2006 to 2008). Professor Sleep was also the Chair of the 2016 Computational Methods in Water Resources Conference held at the University of Toronto in 2016. He is a fellow of the Engineering Institute of Canada.

**JOHN F. UNSWORTH**

John Unsworth is a Professional Engineer licensed in six Canadian Provinces. In 1981 he earned a B.Eng. cum laude in Civil Engineering from Concordia University; and in 1987 obtained an M.Eng. in Structural Engineering from the University of British Columbia. Since graduation he has been engaged in bridge and structures maintenance, design and construction at Canadian Pacific Railway. He is currently the Deputy Chief Engineer and Director of Structures Design at CP. Mr. Unsworth was the Chief Engineer for the reconstruction of nine timber bridges destroyed by fire in 2003 at Myra Canyon near Kelowna.

He is former President of the American Railway Engineering and Maintenance-of-way Association (AREMA). He has also served as Chairman and is an emeritus member of AREMA Committee 15 – Steel Structures. In addition, he is the current Chair of the Association of American Railroads (AAR) Bridge Research Advisory Group and is a former member of the Transportation Research Board (TRB) Steel Bridges Committee. He is a member of the Canadian Society for Civil Engineering (CSCE), American Society of Civil Engineers (ASCE), American Institute of Steel Construction (AISC) and International Association of Bridge and Structural Engineers (IABSE).

He has presented at AREMA Annual Technical Conferences, the International Conference on Arch Bridges, TRB Annual Meetings, CSCE Bridge Conferences, the ASCE Structures Congress and the International Bridge Conference (IBC). He also delivered the 2013 Drag Distinguished Lecture Series at Purdue University. He is the author of *Design and Construction of Modern Steel Railway Bridges* (2nd edition) and has contributed to the fifth edition of the *Structural Steel Designer's Handbook* and the *International Heavy Haul Association (IHHA) Best Practices* books.

# BOURSE DONALD JAMIESON FELLOWSHIP

## JEAN-FRANÇOIS BELLEAU

*Donald Jamieson was a prominent civil engineer in British Columbia, who, until his untimely death in 1983, was the Chair of the 1984 Conference of the International Association of Bridge and Structural Engineers held in Vancouver. The Donald Jamieson Fellowship was established in his honour in 1987. The Fellowship is awarded annually to candidates pursuing full-time graduate studies in structural engineering at a Canadian University.*

The recipient of the Donald Jamieson Fellowship for the 2017-2018 academic year is Jean-François Belleau. .

Jean-François Belleau, Jr Eng., is a graduate (2008) in Civil Engineering Technology from Cégep André-Laurendeau and holds a Bachelor's degree (2012) in Construction Engineering from the École de technologie supérieure (ÉTS). He is currently a Ph.D. candidate in Construction Engineering at ÉTS under the supervision of Doctor Marie-José Nollet, Eng., and Doctor Amar Khaled, Eng.. His research focuses on the seismic vulnerability of bridges from the perspective of their evaluation and rehabilitation. He is interested in the analysis and dynamic behavior of structures in order to improve their seismic design.

During winters of 2013 to 2017, he was teaching assistant for the undergraduate concentration course Bridge Design and Analysis at ÉTS. He worked for internships (2006 to 2011) during his college and bachelor degrees for several companies and institutions to design and supervise different types of structures.

During his graduate studies, including his doctoral degree, he became very involved in occupying various important administrative and social positions at Réseau de l'Université du Québec, at CoopÉTS and at ÉTS. Graduate studies are research, knowledge and intellectual life, but it is also the quest for balance and the demonstration of genuine commitment through community actions to give something better for community.

He was the recipient from 2012 to 2017 of the Canada Graduate Scholarship (NSERC-CGS), the Fonds de recherche du Québec - Nature et technologies and many others. He was the recipient in 2013 of the Quebec Lieutenant Governor's Youth Medal for a sustained voluntary action at the institution, community and social levels.

# MÉDAILLE ALBERT E. BERRY MEDAL

## HEATHER L. MACLEAN

*The Albert E. Berry Medal was established in 1987 in honour of Dr. Albert E. Berry (1894-1984), an outstanding civil engineer who was one of Canada's first environmental pioneers. Following World War I, Dr. Berry joined the Department of Health of the Province of Ontario and rose to become the chief engineer of the sanitary engineering division. Subsequently, he was appointed the first general manager and chief engineer of the Ontario Water Resources Commission, the forerunner of today's Ministry of the Environment. His pioneering spirit, his dedication, and his expertise in the field were second to none. The award is granted to a civil engineer who has contributed significantly to the field of environmental engineering in Canada.*

The recipient of the Albert E. Berry Medal for 2017 is Dr. Heather MacLean.

Heather MacLean is a Professor in the Department of Civil Engineering at the University of Toronto and holds joint-appointments with the Department of Chemical Engineering & Applied Chemistry, School of Public Policy and Governance and the School of the Environment.

She holds a Ph.D. in Civil Engineering and Engineering and Public Policy (1998) and a Masters in Engineering and Public Policy (1997) from Carnegie Mellon University, a Masters of Business Administration from St. Mary's University (1990) and Bachelor of Engineering (Civil) from Dalhousie University/Technical University of Nova Scotia (1988). Dr. MacLean is a registered Professional Engineer in Ontario and member of the Canadian Society for Civil Engineering.

Dr. MacLean's research interests are in the development and application of systems level methods to evaluate the sustainability of infrastructure and product systems, with a focus on current and emerging energy and transportation vehicle systems. Over the last 18 years she has worked closely with the automotive, oil, electricity and biofuels industries as well as governments. She has successfully led many research projects, advancing engineering knowledge as well as inputting into decision-making within industry and government.

Dr. MacLean's work has been recognized through a Premier's Research Excellence Award, CMHC Excellence in Education Award for Promotion of Sustainable Practices, and induction as a Fellow of the Engineering Institute of Canada. She has served on industry and government advisory committees in Canada and the U.S. Over her career Dr. MacLean has published 80 peer-reviewed journal papers, delivered over 200 presentations, and supervised 55 graduate students.

# PRIX CAMILLE DAGENAIS AWARD

## DAVID ZHU

*This award was established in 1981 in honour of Mr. Camille A. Dagenais, Past Chairman of the Board of SNC Group Inc., President of the Canadian Society for Civil Engineering in 1972-1973 and one of the most renowned hydrotechnical engineers in the country. The objective of the award is to give recognition to those civil engineers who have made outstanding contributions to the development and practice of hydrotechnical engineering in Canada.*

The recipient of the Camille A. Dagenais Award for 2017 is Dr. David Zhu.

Dr. David Zhu is a professor in Water Resources Engineering at the University of Alberta. He received his BSc degree from Shanghai Jiaotong University in China, his MEng and PhD degrees from the University of British Columbia. He joined the University of Alberta in 1997.

Dr. Zhu conducts research in hydraulic engineering with a focus on urban drainage and sustainable hydropower. He studied energy dissipation in storm sewer systems and the mechanisms of air induction into sewers, and devised methods for reducing sewer air pressure to prevent sewer odour complaints. His research results have been applied in a number of sewer designs and retrofitting. His research on sand/water interactions following pipeline ruptures revealed the mechanism for soil erosion and sink-hole formation. He assisted BC Hydro in reducing fish entrainment risk by optimizing its operations. His research on reducing air bubble entrainment will allow hydropower companies to reduce/prevent fish-kills during dam spill events. He is also pioneering the design of nature-like fishways to create suitable habitats for multi-species use and fish passage.

Dr. Zhu has supervised over 70 graduate students and published over 140 papers in leading journals. His contributions have been recognized by a number of ASCE and CSCE awards, including Thomas Keefer Medal (2010), Donald Stanley Award (2015), and Samuel Greeley Award (2017). Two of his Master's students also received CSCE Hydrotechnical Best Master's Thesis awards.

Dr. Zhu serves in a number of editorial boards and technical committees, and organized a number of international workshops and conferences in the area of hydrotechnical engineering. He is actively promoting collaborations between Canada and China in urban drainage and sustainable hydropower.

# SANDFORD FLEMING AWARD

## ERIC HILDEBRAND

*The Sandford Fleming Award was established in 1999 in honour of Sir Sandford Fleming (1827-1915), Canada's foremost railway surveyor and railway engineer of the 19th century. He was Chief Engineer of the Intercolonial Railway from Eastern Quebec to Southern New Brunswick and in 1871 he was appointed Chief Engineer of the proposed new Canadian Pacific Railway from Montreal to the Pacific Coast. His railway route from Winnipeg to Vancouver through the Yellowhead Pass is now used by the Canadian National Railway. The CSCE wishes to acknowledge the generosity of the Canadian National Railway for funding this award. The Sandford Fleming Award is presented annually to a member of the CSCE who has made particularly outstanding contributions to the development and practice of transportation engineering in Canada.*

The recipient of the Sandford Fleming Award for 2017 is Dr. Eric Hildebrand.

Eric Hildebrand is a Professor with the Department of Civil Engineering at the University of New Brunswick. He obtained Bachelors and Masters degrees in civil engineering from UNB and a PhD in transportation planning from the University of Waterloo. Prior to joining the faculty at UNB, he worked as a consulting engineer in both Canada and the United States.

His career of over 32 years has covered many aspects of transportation engineering although most of his work has focussed on an area that he is particularly passionate about: road safety engineering. His work in road safety has covered all facets including vehicles, driver performance, and road infrastructure design. He leads the UNB/Transport Canada Collision Investigation Team and has been monitoring motor vehicle crashworthiness and the corresponding role of road infrastructure for over 30 years.

A firm believer that in order to be able to teach engineering you need to 'do' engineering, Eric continues to be involved in many consulting projects which often provide case studies and material for his lectures. In recent years, he has been extensively involved as a road safety auditor on several very large-scale highway projects throughout Canada.

Serving as the Coordinator of the UNB Transportation Group, he has been engaged in the supervision of many Masters and PhD students. Seeing his students grow personally and succeed professionally is the aspect of his career that gives him the most satisfaction. In addition to having received several UNB awards for excellence in teaching, Dr. Hildebrand received the Award of Academic Merit from the Transportation Association of Canada in 2012 in recognition of his long-term contribution to the advancement of the academic field and to the development of future leaders in transportation.

# MÉDAILLE HORST LEIPHOLZ MEDAL

## MONCEF NEHDI

*Established in 1990 in honour of the late Professor Horst Leipholz, a leading civil engineer whose work made a major impact in the field of engineering mechanics, the Horst Leipholz Medal recognizes outstanding contributions to engineering mechanics research and practice in Canada.*

The recipient of the Horst Leipholz Medal for 2017 is Dr. Moncef Nehdi.

Moncef Nehdi received his BAsC from Laval University, MASc from Sherbrooke University and PhD from the University of British Columbia, all in civil engineering. Currently a professor at Western University, he previously served in managerial positions both in industry and academia, for instance as Technical Director at Imasco Minerals, Associate Director for Environmental Research Western and Technical Manager for BCS.

Moncef's current research focusses on smart, self-healing and bio-inspired civil engineering materials, with particular focus on the sustainability and resiliency of civil infrastructure. His R&D and consulting activities have significantly impacted several landmark structures, including two of world's tallest buildings, largest water treatment plant and largest pedestrian bridge.

A prolific author of more than 300 technical publications, his exceptional scholarly work ranked him among the world's most cited civil engineers in the 2016 Shanghai Global Ranking of Academicians. He was awarded the Ontario Premier's Research Excellence Award, the American Concrete Institute's Young Member Award for Professional Achievement, the Bill Curtin Medal from the UK's Institution of Civil Engineers, the Petro Canada Young Innovator Award, the Mohan Mathur Engineering Award for Excellence in Teaching, along with several other accolades and best paper awards.

Moncef is Associate Editor of the Canadian Journal of Civil Engineering and is editorial board member of several other technical journals. A registered professional engineer in Ontario, he has served in various technical committees of the American Concrete Institute, the Canadian Standards Association and several grant awarding agencies.

## PRIX A.B. SANDERSON AWARD

### PATRICK PAULTRE

*The A.B. Sanderson Award was established in 1977 in honour of Adrian Barclay (Sandy) Sanderson (1909-1994), a very distinguished structural engineer and University of British Columbia graduate from Vancouver. Among Mr. Sanderson's best known achievements were the 1954 design of the Mosquito Creek Bridge in North Vancouver, the superstructure of the MacDonald-Cartier Bridge over the Ottawa River, then the longest continuous box girder in North America, and his involvement in the Mount Kobau Astronomical Observatory. The A.B. Sanderson Award is presented to a member of the CSCE who has made particularly outstanding contributions to the development and practice of structural engineering in Canada.*

The recipient of the A.B. Sanderson Award for 2017 is Dr. Patrick Paultre. Patrick Paultre is Professor of Civil Engineering at the University of Sherbrooke, Quebec, Canada, where he has been a faculty member since 1987. He held the Canada Research Chair in Earthquake Engineering and Dynamics of Structures for fourteen years. Prior to his position at the University of Sherbrooke, he was a stress analyst in the aerospace and nuclear division of DSMA in Toronto, Canada; a structural engineer at United Engineers and Contractors in Philadelphia, USA; and a bridge engineer at Dessau, Inc., in Montreal, Canada. Patrick Paultre obtained his Bachelor's degree in engineering in 1977 and his M.Sc.A. degree in 1981 from Polytechnique Montreal and his Ph.D. degree from McGill University in 1987.

Professor Paultre research focuses on dynamics of structures, earthquake-resistant design of concrete structures, behaviour of high-performance concrete structures, dynamic health monitoring of structures, and dam-reservoir-ice-cover-foundation interaction. Professor Paultre has published three books: *Dynamique des structures*, Hermes/Lavoisier, France, *Dynamics of Structures*, Wiley, England and *Structures en béton armé*, Presses Internationales Polytechnique, Montreal. He has published more than 200 peer-reviewed papers in international journals and conferences and more than 100 technical reports. Professor Paultre is a member of Joint ACI-ASCE Committee 441, Reinforced Concrete Columns. He is also a member of the Canadian Standards Association Committee A23.3, Design of Concrete Structures. He is a Fellow of the Canadian Society of Civil Engineering, of the American Concrete Institute, of the Engineering Institute of Canada and of IABSE.

Awards and honours include: the CSCE Gzowski's Medal in 1991 and in 2004, the ASCE's Moisseiff Award. In 1996, the ACI's Wason Medal in 2002 and the CSCE E. Whitman Wright in Award in 2003. Professor Paultre was the recipient of the Adrien-Pouliot Award of the ACFAS (2006), one of the highest scientific honours in Quebec. He received the Institutional Recognition of the Quality of Teaching Award by the Faculty of Engineering of the Université de Sherbrooke. In 2015, Professor Paultre was the recipient of the Armand-Frappier Quebec Prize, one of the highest awards from the Quebec Government for outstanding persons in the field of culture or sciences.

## PRIX WALTER SHANLY AWARD

### TONY BÉGIN

*The Walter Shanly Award is presented to a member of CSCE who, in the opinion of the selection committee, has made truly outstanding contributions to construction engineering research and/or practice in Canada. This may be either through sustained activities over an extended period or through being either the author or principal inspiration and one of the significant authors of three or more peer-reviewed papers on a relatively narrow topic over a period of two to five years in relevant journals of international standing, such as the Canadian Journal of Civil Engineering*

The winner of the Walter Shanly Award for 2017 is Tony Bégin.

Tony Bégin, graduated in civil engineering in 1993 from Sherbrooke University, where he also completed his Master's degree in 1995.

He joined immediately the Canam Group engineering team as a structural steel connection designer. He worked for the Steel Plus Network Canam business unit servicing more than 120 steel fabricators in North America. He has developed the engineering and design assistance services by visiting over 100 engineering firms across Canada. His function today is to promote LEAN Construction practices and the Integrated Project Delivery collaborative approach to professionals, owners and contractors.

He has been a volunteer within the Canadian Society for Civil Engineering (CSCE) over 25 years at different level of the organization including the highest position of President 2015-2016. He is still active as Chair of the Corporate Engagement Committee.

During his CSCE presidential years, Tony has played a key role in getting closer with many others associations such as the Canadian Construction Association (CCA), Canadian Construction Innovation (CCI) and the Canadian Network of Assets Managers (CNAM). He believes that CSCE should play an advocacy role for building and maintaining better sustainable and resilient civil engineering infrastructure across Canada. Today, CSCE and CCI are working together on instilling a new culture for research and innovation with funding from the federal government.

His mobility over the years has led him to develop and maintain an extensive network of over 1,000 business contacts within the construction industry across North America.

## PRIX W. GORDON PLEWES AWARD

### SIOBHAN ROBERTS

*Created in 1992 as the CSCE History of Civil Engineering Award and renamed in 1996 in honour of the late W. Gordon Plewes, author of the CSCE History Program, this award is given annually to an individual who has made particularly noteworthy contributions to the study of the history of civil engineering in Canada or the history of civil engineering achievements by Canadians elsewhere.*

The recipient of the W. Gordon Plewes Award for the year 2017 is Siobhan Roberts for her book “Wind Wizard”

Wind Wizard tells the story of Alan Davenport (1932-2009), the father of modern wind engineering, who investigated how wind navigates the obstacle course of the earth's natural and built environments—and how, when not properly heeded, wind causes buildings and bridges to teeter unduly, sway with abandon, and even collapse.

In 1964, Davenport received a confidential telephone call from two engineers requesting tests on a pair of towers that promised to be the tallest in the world. His resulting wind studies on New York's World Trade Center advanced the art and science of wind engineering with one pioneering innovation after another. Establishing at Western University the first dedicated boundary layer wind tunnel laboratory for civil engineering structures, Davenport enabled the study of the atmospheric region from the earth's surface to three thousand feet, where the air churns with turbulent eddies, the average wind speed increasing with height. Over the years, the revolutionary lab investigated and improved the wind-worthiness of the world's greatest structures, including the CN Tower, the iconic Golden Gate Bridge, and the proposed crossing for the Strait of Messina, linking Sicily with mainland Italy.

Siobhan Roberts is a science journalist who writes currently for The New Yorker's online science section, “Elements.” In addition to Wind Wizard, her books include King of Infinite Space: Donald Coxeter, The Man Who Saved Geometry, and Genius at Play, The Curious Mind of John Horton Conway.

# PRIX JEUNE INGÉNIEUR PROFESSIONNEL/ YOUNG PROFESSIONAL ENGINEER AWARD

## LESLIE SYMON

*Awarded annually to a CSCE Member or Associate Member who has demonstrated outstanding accomplishments as a young professional engineer. Normally, nominees must be no older than 35 as of December 31 of the year that the award is presented.*

The Young Professional Engineer Award for 2017 is presented to Leslie Symon. Leslie Symon, P.Eng., is a Civil Engineering graduate from the University Of Alberta, class of 2011.

Leslie is a Senior Civil Engineer at the LRT Delivery Branch of the City of Edmonton and is currently engaged in the construction of Stage One of the Valley Line LRT. She began her career as a member of the Valley Line owner's engineering team where she was recognized for her strong communication and organizational skills. Leslie's attitude, professionalism, and work ethic set a great example for her peers. She has demonstrated an aptitude for mentoring and leadership which makes her a valuable asset to any team. Leslie has the talent and perspective to tackle challenging problems contributing to the achievement of Edmonton's LRT vision. Leslie joined the City team formally in 2016, and has already become involved in other City projects and corporate initiatives.

Leslie became involved with the Canadian Society of Civil Engineering as a student representative of the CSCE Edmonton Section, and in 2012 proceeded to sit as the youngest ever Section Chair. Leslie oversaw the continued delivery of Edmonton's strong program as well as the initiation of Edmonton's CSCE Young Professional Group. Leslie continues to be involved in the community through her role with Edmonton's NextGen task force, dedicated to creating a city that attracts and gives voice to the next generation by connecting people, places, communities and ideas. Leslie is a competitive soccer player and world traveler, recently completing trips to Japan and Europe, and looking forward to visiting South America soon.

## PRIX JAMES A. VANCE AWARD

### JEFF RANKIN

*Established in 1977 in honour of Dr. James A. Vance (1892-1981), this award is granted to a civil engineer and CSCE member whose dedicated service has furthered the advancement of the Society. Dr. Vance joined the Canadian Society of Civil Engineers as a student in 1914 and, throughout his life, gave unstintingly of his time, resources and talent to the Society and its successor, the Engineering Institute of Canada. Mr. Vance served the Society and the EIC in numerous capacities, including as President of the latter in 1950.*

The recipient of the James A. Vance Award for 2017 is Jeff Rankin..

Dr. Rankin is a Professor and holds the M. Patrick Gillin Chair in Construction Engineering and Management in the Department of Civil Engineering at the University of New Brunswick. Previous to joining the University, Jeff was the Executive Director of the Construction Technology Centre Atlantic, an innovation broker for the region's construction industry. Jeff is a fourth generation builder and began in the construction industry as a labourer during his school years on commercial buildings. His construction experience has included various project and construction management roles in many types of construction projects including high-rise buildings and larger infrastructure projects such as the Confederation Bridge. While completing his doctorate at the University of British Columbia, Jeff's research centered on the development of integrated and distributed construction management systems based on information standards (a precursor to Building Information Modeling). Currently, Jeff's research program focuses on improving the performance of the construction industry through innovation in procurement methods, sustainable practices for the delivery of public infrastructure and the appropriate adoption and implementation of technology. Jeff has co-authored over a hundred academic papers and research reports some of which have been recognized for best paper awards and is very proud of the success of his past and current research students. Jeff has had the pleasure of serving our Society in many technical and administrative roles including: VP Technical Divisions and Committees, Chair of the Construction Division, Technical Co-Chair of several Construction Specialty Conferences, Associate Editor for CJCE, National Honorary Treasurer, Vice President of the Atlantic Region, and four terms as a member of the National Management Committee and Board of Directors.

## PRIX DONALD R. STANLEY AWARD

### MAMERT MBONIMPA, MÉDARD BOUDA, ISABELLE DEMERS, MOSTAFA BENZAAZOUA, DENIS BOIS, AND MARIO GAGNON

*The Donald R. Stanley Award was established in 2006 in honour of the late Dr. Don Stanley, a leader in the transfer of research and technology into the practice of Environmental Engineering. In 1954, Dr. Stanley founded Stanley Associates Engineering, a one-person operation that has since grown into Stantec Inc., an international, multi-disciplinary organization with 80 locations worldwide. The CSE wishes to acknowledge the generosity of Stantec Consulting Ltd. for the establishment of the initial endowment of the Donald Stanley Award.*

The 2017 Prix Donald R. Stanley Award is granted to Mamert Mbonimpa, Médard Bouda, Isabelle Demers, Mostafa Benzaazoua, Denis Bois, and Mario Gagnon for their paper entitled “Preliminary geotechnical assessment of the potential use of mixtures of soil and acid mine drainage neutralization sludge as materials for the moisture retention layer of covers with capillary barrier effects” *Can. Geotech. J.* 53: 828–838 (2016)

**Abstract:** Lime treatment of acid mine drainage (AMD) generates sludge that is commonly stored in ponds for dewatering. The use of soil-aged sludge-based mixtures for mine site rehabilitation can allow the emptying of existing basins, thus extending their storage capacity, reducing the volume of the borrow soil pit required for mine site rehabilitation, and consequently reducing the mine footprint. The authors investigated the geotechnical properties of siltysoil–sludge mixtures (SSMs) as possible components of covers with capillary barrier effects (CCBEs) to prevent AMD generation from mine waste. SSMs with [1] values of 10%, 15%, 20%, and 25% sludge ( $[1] = \text{wet sludge mass} / \text{wet soil mass}$ ) were studied. Two water contents were considered for each of the mixture components: 175% and 200% for the sludge and 7.5% and 12.5% for the soil. Results indicate that saturated hydraulic conductivity ( $k_{sat}$ ) values were in the range of 10–5 cm/s for the soil and SSMs at void ratios ranging from 0.28 to 0.53, with values decreasing slightly when [1] was increased from 0% to 25%. The air-entry value (AEV) increased from 20k Pa for the soil alone to 35k Pa for the SSM with  $[1] = 25\%$ . These values of  $k_{sat}$  and AEV are comparable to those of materials used in the moisture retention layers of existing efficient CCBEs. However, the volumetric shrinkage increased from about 2% for the soil alone to values ranging between 24% and 32% for the SSM with  $[1] = 25\%$ , depending on the initial water contents of the components. Tools are provided to estimate to which extent the use of sludge in SSMs can reduce the volume of borrow natural soil required for a moisture retention layer of a CCBE.

## MÉDAILLE THOMAS C. KEEFER MEDAL

### SHOOKA KARIMPOUR AND VINCENT H. CHU

*Thomas Coltrin Keefer (1821-1915), who is probably the best-known member of the Keefer dynasty, was a co-founder in 1887 of the CSCE and its first president. He is particularly remembered for his work in the construction of canals, railways, and water supply systems (Ottawa, Hamilton, and Montreal). His best known publications are “Philosophy of Railroads” (1849) and “The Canals of Canada” (1850). During his career Thomas Keefer was also president of the A.S.C.E., of the Canadian Institute, and of the Royal Society of Canada. The Keefer Medal, established in 1942, is presented annually for the best civil engineering paper in hydrotechnical, transportation or environmental engineering.*

The Thomas C. Keefer Medal for 2017 is awarded to Shooka Karimpour and Vincent H. Chu for their paper entitled “Instability of unbounded transverse mixing layer in shallow waters” *Can. J. Civ. Eng.* 43: 504–510 (2016)

**Abstract:** This paper examines the role of waves in the development of the instability of an unbounded transverse mixing layer in shallow waters. In supercritical state waves become significant. The matching of the wave-like asymptotic solution in the far field to the solutions near the inflection and the returning surfaces poses a difficult mathematical problem. We therefore conducted numerical simulations to find solutions directly from the shallow water equations. The simulations found that the growing waves in the unstable current had a consistent structure throughout the linear stage of the instability’s development. The excitation, reflection, and transmission of waves produced a modulating instability that maintained a consistent structure as the amplitude of the instability increased over many orders of magnitude. This role of the waves on the supercritical instability, as delineated by our numerical simulations, is not solely describable by the classical analytical method.

**Key words:** shear instabilities, shallow flow, waves in currents, direct numerical simulations.

**Honourable Mention:** to Vincent Boulanger-Martel, Bruno Bussière, Jean Côté, and Mamert Mbonimpa for their paper entitled “Influence of freeze–thaw cycles on the performance of covers with capillary barrier effects made of crushed rock–bentonite mixtures to control oxygen migration” *Can. Geotech. J.* 53: 753–764 (2016).

# MÉDAILLE CASIMIR GZOWSKI MEDAL

## SUZE YOUANCE, MARIE-JOSÉ NOLLET AND GHYSLAINE MCCLURE

*As superintendent of public works of the Province of Canada, Colonel Sir Casimir Stanislaus Gzowski (1813-1898) was responsible for improving waterways and canals and constructing roads, harbours and bridges. Later, he was involved in railroad construction and the design and construction of the international bridge at Fort Erie. A founder of the CSCE in 1887, he served as president from 1889 to 1891. Established by Sir Casimir in 1890, the Casimir Gzowski Medal is awarded annually for the best civil engineering paper in surveying, structural engineering or heavy construction.*

The Casimir Gzowski Medal for 2017 is awarded to Suze Youance, Marie-José Nollet, and Ghyslaine McClure for their paper entitled “Effect of critical sub-system failures on the post-earthquake functionality of buildings: A case study for Montreal hospitals” *Can. J. Civ. Eng.* 43: 929–942 (2016)

**Abstract:** When an earthquake occurs, hospitals are expected to remain functional as they play a crucial role in emergency care operations. This ability to ensure the continuity of quality operations while ensuring the safety of occupants during and after an earthquake defines the concept of post-earthquake functionality. Hospital functionality relies on the good performance of a large number of critical sub-systems, components and equipment. Although the global seismic performance of building structures and their nonstructural components was extensively observed in several post-disaster reconnaissance surveys, there is limited and incomplete information on the effect of building and nonstructural damage on post-earthquake functionality. The objective of this paper is to present a methodology for the assessment of post-earthquake functionality of existing Montreal hospitals using fault-tree analysis. The study shows that using specific and accurate information on the vulnerability and fragility of structural and critical nonstructural components, a probabilistic index of post-earthquake functionality of the entire facility is computed which informs mitigation action for the critical failure processes through the system.

**Key words:** buildings, seismic evaluation, performance-based earthquake engineering, system reliability.

**Honourable Mention:** to Tomas Plesnik, Ghasan Doudak, and Jeffrey Erochko for their paper entitled “Testing and analytical modelling of intermediate gypsum wallboard in wood shear wall sheathing to framing connections” *Can. J. Civ. Eng.* 43: 968–976 (2016)

# **AWARD FOR GOVERNMENTAL LEADERSHIP IN SUSTAINABLE INFRASTRUCTURE / LE PRIX POUR LE LEADERSHIP GOUVERNEMENTAL EN INFRASTRUCTURE DURABLE**

*Established in 2011, the primary objective of this award is to provide recognition to Canadian governmental organizations for true innovation and leadership in the development and guardianship of sustainable civil engineering infrastructure projects or systems. The overarching principle for selecting the recipient of the award is the leadership that the recipient has provided with respect to the integration of sustainability in the design and/or operation of civil engineering infrastructure. As such, there is an expectation that nominations highlight demonstrated excellence in advancing the state-of-the-art in building or maintaining public infrastructure with extraordinary commitment to sustainability.*

The 2016 Award for Governmental Leadership is awarded to the City of Vancouver.

In 2010, the City of Vancouver adopted an ambitious plan to become the greenest city in the world by 2020. Since adopting it, Vancouver has become recognized internationally for its leadership in sustainable actions. Behind the scenes, these ambitious green goals are aligned with social and economic goals as laid out in a Healthy City Strategy and Economic Strategy.

The Greenest City Action Plan was developed through an extensive engagement process, and sets out strategic actions in ten goal areas, several of which are "owned" by Vancouver's Engineering department - including Green Transportation, Zero Waste, and Water Conservation. This means that Engineering Services is not only key to meeting the targets, but that they are responsible for helping to reach them. Importantly, they proactively report back on progress toward meeting all goals each spring.

The City has made big progress, from reimagining the future of waste, capturing landfill gas for reuse, reaching its 2020 transportation goals 5 years in advance, creating vibrant public spaces, and building them all in a sustainable way – from having the largest elective vehicle fleet in Canada to using recycled materials in their warm mix asphalt.

The City of Vancouver has been a strong leader in how infrastructure can be built not only in an economically and environmental sustainable way, but to foster social and green behaviours that will last for the long-term.

# **PRESIDENT'S AWARD FOR THE BEST STUDENT CHAPTER**

## **PRIX DU PRÉSIDENT POUR LE MEILLEUR CHAPITRE ÉTUDIANT**
